Plan for Supporting Safe Collection and Disposal of Waste Devices

As required by California Public Resources Code Section 47115-47116 and Minnesota Statutes 2017, Section 116.835 (Safe Sharps Management)

Bioverativ supports the safe collection and proper disposal of waste sharp devices associated with its products.

The statutory requirements of California and Minnesota apply to two (2) of our products – ALPROLIX® and ELOCTATE®. Outlined below are the actions Bioverativ has taken to date with regard to the foregoing products:

- ALPROLIX and ELOCTATE are self-administered hemophilia therapies (ALPROLIX directed to patients with Hemophilia B and ELOCTATE is directed to patients with Hemophilia A) through licensed specialty pharmacies and home care pharmacies.
- Bioverativ works with these pharmacies and our own Patient Services Group to provide patients with Sharps containers and disposal programs in accordance with California and Minnesota medical waste requirements.
- Around the time of launch, Bioverativ informed all of our specialty and home care pharmacies in California and Minnesota of the relevant regulations to ensure that they have proper and effective sharps disposal procedures in place. Bioverativ will, on a yearly basis, remind these specialty and home care pharmacies in California and Minnesota about the requirements of a sharps disposal program.
- To improve patient education on this topic, we have structured our ALPROLIX and ELOCTATE websites to include instructions on proper sharps disposal.
- We have also provided patient guidance on the proper disposal of sharps in the Instructions for Use (“IFUs”) with each ALPROLIX and ELOCTATE product package.

Additional sharps disposal guidance is available at the following websites:

<http://www.calrecycle.ca.gov/HomeHazWaste/Sharps/>

<https://www.pca.state.mn.us/living-green/disposing-needles-and-syringes>

Bioverativ will periodically review this plan and will provide updates to its patients, licensed distributors, and licensed specialty pharmacies and will file this plan with California and Minnesota per the applicable regulations.
